Flu precautions

With the spread of the H1N1 virus, please be sure to keep your child home, and visit a doctor if he/she has flu-like symptoms including fever, cough and sore throat.

Take these everyday steps to protect the health of our children:

- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol-based hand cleaners are also effective.
- Avoid touching your eyes, nose or mouth. Germs spread this way.
- Try to avoid close contact with sick people.
- If you are sick with flu-like illness, [CDC recommends that you stay home for at least 24 hours after your fever is gone](#) except to get medical care. (Your fever should be gone without the use of a fever-reducing medicine.) Keep away from others as much as possible to keep from making others sick.

For more information about the H1N1 virus, visit the CDC website at:
